Aluminium Recycling Stakeholders Meet Non-Ferrous Metal Scrap Recycling Framework, 2020

Date: 18th October 2021, Time: 3:30 pm to 6:00 pm

Venue: online (Microsoft team)

Non-Ferrous metal scrap recycling framework, 2020 was published by Ministry of Mines to promote, improve, support non-ferrous metal recycling activity specifically for aluminium, copper, lead and zinc and Metal Recycling Authority (currently JNARDDC is nominated by Ministry of Mines) will be the nodal agency for implementation/monitoring/ developing framework etc. Non-Ferrous Scrap Metal Recycling Framework intends to promote metal recycling in well organised and technically sound manner. As per the framework, various roles and responsibilities of scrap value chain viz. scrap dismantlers, processors, recyclers, original equipment manufacturers, and even public at large are envisaged and participation of stakeholders are very crucial for overall development of the recycling sector.

To listen to the industry, a stakeholders meet is planned, and deliberations from industry leaders will be organized to enlighten the perspectives of the framework which will help MRA to comprehend real/actual scenario of the recycling activities in the country and valid inputs from participants during these meetings will be considered while preparing comprehensive framework including standards and other documents. Involvement of active stakeholders right from documentation stage will help effective implementation of the framework. During stakeholders meet, it is expected to have deliberations on technical as well as non-technical contexts of metal recycling to help evolve a uniform framework for the nation.

INVITEES

Shri Satendra Singh (Joint Secretary) & Shri Amit Saran (Director)
Ministry of Mines, Govt of India

PROGRAM

4:00 pm – Welcome address by Dr A Agnihotri, Director, JNARDDC

4:10 pm – Brief presentation on framework, R N Chouhan, Head, Downstream

4:20 pm – Address by MRAI, ASMA, ANMA, FAIAUM

- Industry statistics (import-export, production, consumption, market share etc. of aluminium)
- Recycling process/practices of aluminium, ISRI classifications (representative pictures)
- End users of recycled aluminium
- Environment aspects of recycling and waste disposal
- Current applicable rules & regulations to a recycling unit
- Current applicable rules/regulations for importing/trading of aluminium scrap & recycled metal
- Technical needs of the industry

5:40 pm – Address by ISRI

6:00 pm – Q&A/Discussions/Closing remarks

in association with

ASMA

ANMA

FAIAUM

Organised by

Metal Recycling Authority

Ministry of Mines, Govt of India
